

BackBoxx™ JR™ J-Box Surround

*Protect your devices and wires...meet
new building codes all at the same time!*

Use BackBoxx™ JR™ behind each junction-box and plaster ring on your next installation to protect devices and prevent wire damage.

- Protects wires from spray foam insulation with new, tear-off flap snaps that cover wires
- Keeps long wire leads safe behind drywall during cutting, taping and painting by allowing wire coil to be stored in cavity
- Maintains vapor barrier integrity behind j-boxes and plaster rings to meet new “tight building” codes
- Protects speakers from harmful blown insulation, moisture and dirt through patented design
- Lets you make more accurate speaker cuts on retrofits with “bullseye” design
- Accommodates backless j-boxes with deep 3 ½” construction
- Attaches quickly to studs with staple gun
- Cuts and slides easily to adjust for narrower stud widths
- Stays flexible in cold temperatures; is rugged and lightweight
- Stacks for easy inventory and transport
